

Hello Interested Parents & Students!

I'm Tej Murudkar and I'll be hosting an AP Calculus AB Exam Preparation Course with The Study Buds. This is an outline of the course which includes: the course description, all material to be covered, session breakdown, pricing and payment, session times and dates, and my contact information for any further questions.

Course Description:

AP Calculus AB is broken down into 8 units which have their respective exam weightings. Even with differing weighting, all units are equally important, so they will each be covered thoroughly. Roughly one unit will be covered each session. This will leave 2 sessions before the exam to practice AP-style Free Response Questions which are a large part of this exam. **Sessions will be every Monday from 7 PM to 9 PM on a virtual Zoom call that students can access from their emails.**

Session Dates:

2/28- Unit 1: Limits and Continuity (10-12%)
3/7- Unit 2: Differentiation: Definition and Fundamental Properties (10-12%)
3/14- Unit 3: Differentiation: Composite, Implicit, and Inverse Functions (9-13%)
3/21- Unit 4: Contextual Applications of Differentiation (10-15%)
3/28- Unit 5: Analytical Applications of Differentiation (15-18%)
4/4- Optional FRQ Practice (Spring Break)
4/11- Unit 6: Integration and Accumulation of Change (17-20%)
4/18- Unit 7: Differential Equations (6-12%)
4/25- Unit 8: Applications of Integration (10-15%)
5/2- FRQ Practice (last session)

5/9- AP Calculus AB Exam Day!!

Session Breakdown:

The first hour and a half will be instruction. We will cover the key points from each unit, including general review and practice problems, and attack details some may have forgotten that will give my students that extra edge on the exam. Of course, students can ask questions at any time during instruction, as this is meant to be as interactive as possible, but I'll leave a remainder of the two hour session, about 30 minutes, purely for extra questions students may have.

Pricing and Payment:

The course is **\$150**, and payment can be made to **@thestudybuds** on Venmo or **404-884-4648** on Zelle, PayPal, or Cash App. **Payment is due by 3/7.** As noted on the flier, this course has been advertised to provide a *guaranteed* passing AP exam score (3 or higher) or your money back.

The refund comes with the following conditions:

- Student earned an unweighted average of 84.5 or above in their Precalculus course,
- Starts this prep course with above a 79.5 average in their AP Calculus AB class,
- All assigned practice worksheets were turned in (with correct or corrected answers)
- Full attendance in course.

This will guarantee a 3 on the AP exam or we will issue a full refund. FYI, a score of 3 is fantastic and is accepted at many colleges, but most schools will need a 4 or 5 to earn college credit hours, which isn't difficult to reach with this course.

Feel free to contact me at 678-736-3958 or tejmurudkar22@gmail.com if you have any questions!

Thank you for your support, and I hope to see many students join as we tackle this AP exam!
